AEXON LABS

16 NOVEMBER 2026

Orexin research pipeline

● Documented stage ○ Planned work

Research asset		Candidate selection	Receptor pharmacology	Animal pharmacology	Preclinical regulatory studies
DOXA	**Dual orexin receptor agonists**				
AEX-2	Narcolepsy			●	○
AEX-41	Narcolepsy			●	
AEX-3	OX2R-focused research			●	
DCOM	**Dual Circadian Orexin Modulation**				
HC02	Priority matched pair		●		
HC01	Comparison pair		●		
HC03	Reserve pair		●		

AEX-2 / Planned preclinical regulatory studies

Addiction research: cocaine-conditioned place preference in mice and morphine self-administration in rats.

Oral exposure and early safety data will guide subsequent safety pharmacology and GLP toxicology.
